NEXT MOVE

Trace demand loss by channel and customer region

EXPLORE COMMERCE INTELLIGENCE

EXECUTIVE

SALES + CUSTOMERS

PRODUCTS + MERCH

CHANNELS + OPS

- Latest revenue: \$54K
- Orders: 348, down 23.5%
- AOV: \$156.13, up 9.9%
- Item margin: 49.3%
- Cohort return rate: 5.0%
- Luma Pack 115 return alert: 44.4%

AOV improved while orders fell. Next: trace demand loss, then test the affected product/channel mix for margin and return risk.

Orders, order lines, customers, products, returns, marketing spend, inventory, dates, and targets. Gross margin is used only where item-level cost fields support it.

PRACTICE OPERATIONS

Access, attendance quality, provider performance, and collections.

MANAGEMENT SIGNALS

- Revenue: \$133K
- Patients served: 296
- Appointments: 323
- No-show: 7.1% vs 4.0% target
- Taylor Ramos: 12.0% no-show

IMPORTANT DEFINITION

First visit means the earliest observed visit in the available dataset. It is not a lifetime acquisition date.

BUSINESS QUESTIONS

Is growth converting into completed care? Which providers need attendance support? Where are receivables or insurance claims slowing collections?

Owner-operator and field-service decisions.

EMBER & OAK KITCHEN / RESTAURANT OPERATIONS

Category Sales and Gross Contribution

Category	Item Sales	Menu Gross Contribution	Food Cost %
Beverage	\$118,269	\$85,538	27.7%
Dessert	\$41,841	\$31,344	25.1%
Entree	\$581,850	\$581,850	34.1%
Side	\$54,017	\$39,366	27.1%
Starter	\$90,118	\$66,096	26.7%
Total	\$1,187,451	\$804,194	32.3%

Food cost is 5.0% above target

SIGNAL

Food cost reached 35.0% versus a 30.0% target, pressuring menu gross contribution.

NEXT STEP

Review recipe cost and pricing for high-volume items, then compare recent protein purchases.

Sales, menu economics, food cost, purchasing, channels, and owner/operator follow-up.

Latest food cost is 35.0%, five points above target. Labor-based profitability remains on Source Hold because the labor source failed consistency checks; unsupported profit is not implied.

FROSTLINE HOME COMFORT / FIELD-SERVICE OPERATIONS

Frostline Home Comfort

Home Comfort Performance Intelligence

Service demand + technician capacity + quality + direct contribution

Demer-based residential and light-commercial HVAC service business. Balance seasonal demand, technician capacity, service quality, and profitable growth.

EXECUTIVE OVERVIEW

SERVICE OPERATIONS

FINANCE + CUSTOMERS

TECHNICIAN PERFORMANCE

Service demand, technician utilization, first-time fix, CSAT, customers, and direct service economics.

Latest utilization is 89.8% and first-time fix is 78.2%. Direct Service Contribution is explicitly not operating profit because broader operating expenses are not present.

HOW I WORK

Business problem. Analytical model. Decision signal.

The work in this portfolio is organized around management use, not dashboard production alone.

01 Start with the decision

Define the operating question, intended audience, and follow-up action before selecting metrics.

02 Protect metric meaning

Align measures to source grain, relationships, time context, and available cost definitions.

03 Make limits visible

Withhold unsupported calculations and state analytical boundaries without obscuring the useful evidence.

CAPABILITIES

Power BI | Power Query | DAX | dimensional modeling | KPI architecture | data validation | executive reporting | supply chain and operations analytics
